Giovanni Riboli

Creating well-being for over 20 years

Founded in southwestern France, the company has established itself throughout the country thanks to its network of nearly 40 exclusive stores and a factory in Europe.

It also stands out for its research and design office, dynamic sales department, and responsive after-sales service.

These strengths make Giovanni Riboli a key player in the spa market today, offering high-quality solutions for the comfort and relaxation of its customers.

Equipment

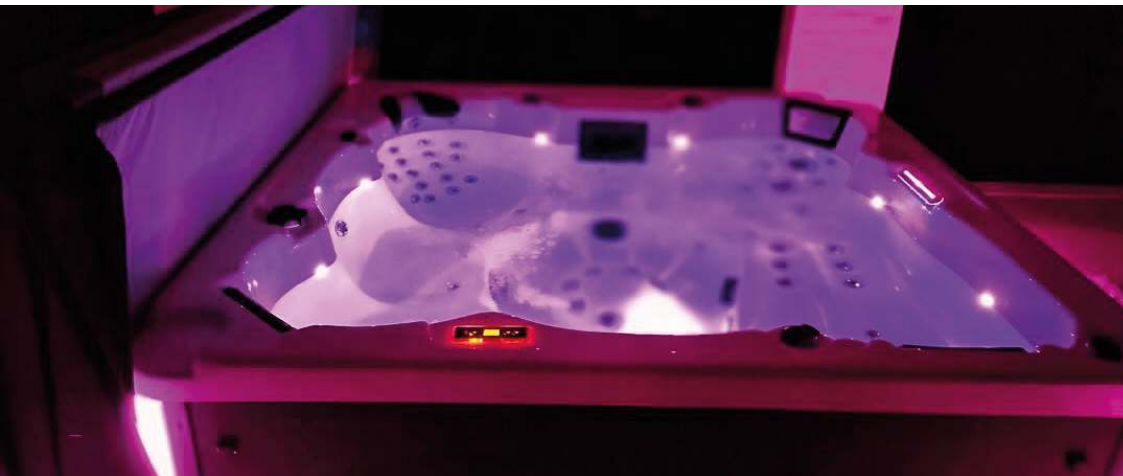

Chromotherapy & Aromatherapy

Chromotherapy and aromatherapy are two alternative medicine practices used to enhance well-being.

Chromotherapy is based on the use of colours to harmonise the body's energy. According to practitioners, each colour emits a specific vibration that can influence the chakras or mood, helping to treat various physical and emotional imbalances. Modern spas, including those in this range, are equipped with LED lighting systems that allow you to select fixed colours or alternate them in smooth transitions, providing a deeply soothing experience.

Aromatherapy, meanwhile, uses essential oils derived from plants to promote health and relaxation. Aroma-Pure, integrated into the Giovanni Riboli spa range, diffuses these essential oils for a comprehensive therapeutic approach. This ancient method is renowned for naturally relieving everyday ailments such as fatigue, muscle pain, and stress. The essential oils used are volatile, non-greasy substances extracted from carefully selected plants known for their beneficial properties.

Combined in our spas, these two practices create an environment dedicated to relaxation and holistic well-being.

SPA RIMINI

The Rimini spa combines comfort, performance, and durability thanks to its advanced technology.

Its EcoEnergie® 5 m³/h filtration system keeps the water clean while reducing energy consumption. Equipped with a **2.5 HP massage pump**, it delivers powerful yet relaxing massages.

ISOPLUS® reinforced thermal insulation helps retain heat for longer, effectively reducing energy costs. **The lockable isothermal cover** ensures safety and maintains the ideal temperature when the spa is not in use.

Anti-bacterial treatment is proemptyd by a PURE UV lamp, which eliminates bacteria without the need for chemicals.

Integrated **chromotherapy**, combined with **RGB LED lighting**, allows you to customise the ambience for a soothing and restorative effect.

Finally, the spa features **stainless steel jets**, adding both elegance and long-lasting durability to its design.

SPA CAPRI

This spa offers a range of advanced features for an optimal wellness experience. It includes stimulating and relaxing **foot reflexology massages** for total comfort. The **EcoEnergie® 5 m³/h filtration pump** keeps the water crystal clear while saving energy. A **3 HP massage pump** and an **air massage pump** deliver both powerful and soothing massages. The variable-power massage system lets you adjust jet intensity for a fully personalised experience.

ISOPLUS® reinforced thermal insulation helps retain heat and reduces energy consumption, while the **lockable isothermal cover** ensures safety and protection when the spa is not in use. Water treatment is enhanced by a **PURE UV lamp**, which eliminates bacteria without the use of chemicals.

To create a soothing atmosphere, the **spa features chromotherapy with Diamond RGB corner lights, an RGB LED strip, and an RGB waterfall**, all working together to produce relaxing visual effects. **Aromatherapy** adds the finishing touch, diffusing delicate, beneficial scents for deeper relaxation.

Finally, the spa is equipped with **RGB glass holders** for customised ambient lighting, as well as **stainless steel jets and nozzles**, adding a touch of elegance and lasting durability to its design.

SPA DE NAGE POSITANO

This swim spa combines performance and energy efficiency, making it ideal for both relaxation and aquatic exercise. It is equipped **with a 10 m³/h EcoEnergie® filtration pump** that keeps the water crystal clear at all times while reducing energy consumption. The **two 3 HP swim pumps** deliver optimal power for a smooth and enjoyable swimming experience, while **the 2 HP massage pump** provides moments of deep relaxation with targeted, soothing massages.

ISOPLUS® reinforced thermal insulation helps retain water heat for longer, minimizing heat loss and maximizing energy efficiency. In addition, integrated **chromotherapy** creates a calming atmosphere through coloured lighting effects, promoting both mental and physical relaxation.

The PURE UV lamp treatment system ensures impeccable hygiene by effectively eliminating bacteria without the use of chemicals.

This swim spa also features a lockable insulated cover for optimal safety, along with stainless steel jets and a swim bar that combine durability and elegance.
